Notes from Liberty

By Allan Beegle
LCS Chief Numismatist

With multiple staff on vacations in July, the rest of us were exceedingly busy. In particular, it seemed like we were constantly being offered collections, some of which included awesome pieces of history.

Most items featured in last month's offerings sold out, with the major exception being that we still have a few specimens of Better-Date Morgan Silver Dollars where we had several pieces available. To my surprise, though, the items listed in this column did not sell well. Go figure.

One collection we purchased was especially interesting. It was a US Type Coin collection formed by a knowledgeable collector over several decades. The focus was on rarity and quality rather than quantity. From this collection we have selected to offer **9 Spectacular Coins From a Decades-Long US Rare Coin Collection**. There are a number of pieces in this offering that we see maybe once every 5-10 years, but mostly in lower quality than the treasures offered here. A particular prize is the **1796 Draped Bust Small Eagle Quarter**, a one year type from the very first year that the US Mint struck that denomination.

We also had the good fortune to acquire moderate quantities of two different **Canadian Silver Coins At Bullion Prices!** One of these groups, the 2013 1-1/2 Ounce Silver \$8.00 Polar Bears, we have not previously had in stock in quantity. The other group, that we just purchased Monday this week, was the 2016 1 Ounce Silver \$5.00 Superman coins. When we offered the

Prices quoted are for quantities indicated, and are actual selling prices at today's closes. Smaller lots are available at slightly higher prices. No Michigan Sales Tax on rare coins or precious metals bullion. Numismatic purchases have a 14 day return period. Orders for bullion-priced items (marked with *) are not returnable and, after confirmation, cannot be cancelled.

Superman coins upon their original release just over two years ago, your response was one of the strongest we have ever experienced. We are pleased to again offer more of these. Both coins are priced at money-saving levels—at the same time that the price of silver is at the lowest levels in more than a year!

There simply is not enough space in our flyers or in this column to list all of the interesting bargains we have picked up over the last several weeks. However, you can go to the list of coins and currency offered for sale at our website, www.libertycoinservice.com, where we have added hundreds of pieces.

Among the categories of coins where we have added the most listings are in US Standing Liberty Quarters, US Seated Liberty Half Dollars, US Franklin Half Dollars, a number of ancient Greek and Roman issues, and Chinese Panda coinage. Enjoy taking some time to peruse all of the listings. By the way, demand for the rare coins and currency we list on our website has been our strongest growth area over the past year.

Don't delay. Review our offers, then reach our Trading Desk toll-free at 800-527-2375 to check on availability, prices (for the Canadian Silver Coins), and to confirm your order.

Here are a few more special bargains we recently purchased:

High Grade 1934 \$1,000 Federal Reserve Note: This Series 1934A \$1,000 Federal Reserve Note issued for the Chicago

District has been graded by PCGS Currency as Choice Extremely Fine-45. However, in our judgment, this note has only one fold, vertical in the center, which means the note really grades About Uncirculated. Even under close inspection, some might call this note uncirculated. However, there is just enough faint discoloration from past handling, most noticeable in the center of the reverse, for the grading service to assign the lower grade that it did.

This is almost certainly one of the highest quality Choice Extremely Fine-45 notes you could ever hope to find. It is also the nicest quality \$1,000 US currency we have handled in years. You can own it for \$2,650 (Michigan residents would need to add 6% sales tax).

Beautiful 1955 Double Die Obverse Lincoln Cent: When some coin dies are improperly prepared, the impression of the details can end up doubled. Perhaps the most famous and the most obvious US coin where the obverse letters and numbers are plainly doubled is the moderate number of 1955 Lincoln Cents struck at the Philadelphia Mint. "IN GOD WE TRUST," "LIBERTY," and "1955" are all clearly imprinted two times on the front of the coin, somewhat offset from each other.

Whenever we get a nice 1955 Double Die Lincoln Cent, they never seem to last long. This lovely specimen has been certified

Gold:	\$1,213.50
Silver:	\$15.42
Platinum:	\$830.00
Palladium:	\$900.00

About Uncirculated-53 Brown by NGC. Close to mark-free. In major auctions this year, coins of this grade have sold for as much as \$1,440. You can own this beauty for \$1,250. *PCGS Retail* catalogs the coin in AU-53 quality for \$1,750. *Coin Values* lists AU-50 specimens at \$2,000 and those in AU-58 grade at \$2,250.

Pre-Civil War US Gold Coins: It is always fun to handle circulated pre-Civil War US Gold Coins. You can dream about who may have had the pieces pass through their hands and the kinds of transactions for which they were used as payment. In this era, gold coins had huge purchasing power.

Here are some lovely circulated specimens we recently acquired:

1836 \$2.50 Classic Head, Extremely Fine-40, NGC—\$725. The first \$2.50 US Gold Coins, struck in only 20 years from 1796 to early 1834, contained 4.37 grams of 22 karat (.9167 purity) gold. As the value of the gold exceeded face value, many of these coins were melted down, as also happened with early \$5.00 and \$10.00 US Gold Coins. In 1834, the US Mint came out with a new issue of \$2.50 and \$5.00 Gold Coins with the gross weights reduced to 4.18 and 8.36 grams, respectively, and the gold purity reduced to 89.92%. The purity of \$2.50 Classic Gold Coins increased to 90% in 1837, making the 1836 issue the last circulating Quarter Eagle not made of .900 fine gold.

The Classic Head Quarter Eagles were only struck for six years, up to 1839, before the design was replaced by the long-running Liberty Series. Only 968,228 Classic Head Quarter Eagles were struck for the entire series, with the 1836 date being the most common. *PCGS Retail* and *Coin Values*, catalog these coins for \$800, and \$925.

1847-O \$10.00 Liberty, Extremely Fine-40, NGC—\$950. The New Orleans Mint opened in 1838, closed at the start of the Civil War, and was later used mostly to strike Morgan Silver Dollars until it ceased operations after 1909. Most New Orleans Gold Coins are low-mintage favorites highly prized by collectors. However, the 1847-O \$10.00 Liberty, with a mintage of 517,500, had the highest mintage for any New Orleans Gold Coin. You can own a specimen from this historic Mint at a reasonable price. *PCGS Retail* and *Coin Values*, respectively, are \$1,150 and \$1,050.

1934-A \$1,000 Federal Reserve Note EF45
PCGS Certified - \$2,650 (plus 6% sales tax for Michigan Residents)

1955 Doubled Die Obverse Lincoln Cent
AU53 BN NGC Certified - \$1,250

1849 \$10 Liberty
XF45 NGC Certified - \$795

9 Spectacular Coins From A Decades-Long US Rare Coin Collection!

Tom Coulson LCS General Manager, and Allan Beegle, LCS Chief Numismatist

Hundreds of times over the decades, it has been Liberty Coin Service's privilege and honor to be the dealer that advanced numismatists turn to when they are looking to sell their personal collections.

Just over a month ago, we acquired an amazing collection put together over a lifetime by a fussy collector. As you might suspect, he patiently built his collection, looking for coins that possessed both rarity and exceptional quality for the issue. He emphasized quality over quantity.

All of the nine coins we offer here have been certified by either the Professional Coin Grading Service (PCGS) or Numismatic Guaranty Corporation (NGC) as well as meeting our own strict quality standards. Some of these pieces may be highest quality we have ever handled for the issue! In addition, several pieces have superior eye appeal compared to other specimens of the same technical grade—just what you would expect a seasoned and savvy numismatist to seek out and acquire.

Most surviving US coins issued before 1850 were cleaned at some point. So long as the cleaning was gentle and long ago, the grading services are willing to certify such coins without comments about having been cleaned.

Since every coin offered here is one-of-a-kind, we have omitted the order blank. Call our Trading Desk at **800-527-2375** to check on availability and to lock in your purchase.

Your satisfaction is guaranteed. You have 14 days upon your receipt of these coins to return them for a full, no-questions refund.

P.S. Whichever of these coins you pick up, we would appreciate if you would do us a favor. When the time comes for you to put these coins up for sale, would you do Liberty Coin Service the honor of contacting us? Thank you.

1. 1810/09 Classic Head Large Cent, Choice Extremely Fine-45 Brown, NGC—\$2,695. Don't let the mintage of 1,458,500 Large Cents of all varieties struck by the US Mint in 1810 fool you into thinking this is a common issue. Although we could not locate population data

for this overdate variety certified by NGC, in the 32 years that PCGS has been in operation it has graded a meager 34 specimens of the 1810/09 Large Cent in Choice Extremely Fine-45 and all higher grades combined!

One reason there are so few nice certified specimens is that the copper planchets used to strike Classic Head Large Cents (struck only for 7 years, from 1808 to 1814) tended to be porous, meaning that they were unattractive at the moment they were struck.

Of US Copper Coins struck before the Civil War in this grade, this is one of the most attractive specimens you could hope to find. Corrosion-free and problem-free. The chocolate brown color is evenly distributed. Possibly the finest specimen we have ever handled.

PCGS Retail catalogs this coin for \$3,150. *Coin Values* lists this overdate at \$2,250 for Extremely Fine-40 and at \$4,350 for About Uncirculated grades. The 2019 edition of *A Guidebook Of United States Coins*, popularly called *The Red Book*, puts a value of \$1,700 in Extremely Fine-40 and does not list a catalog value for any higher grade.

2. 1800 Draped Bust Heraldic Eagle Half Dime, Extremely Fine-40, PCGS—\$3,995. Mintage for this date is uncertain. Some researchers contend that 40,000 were struck while others think production was only 24,000 coins. Whichever is correct, this is obviously a rare coin, especially when you consider that the US Mint in 2016 struck more than 1.5 billion 5-cent coins for circulation! The 1800 date may be the highest mintage of the four years that this series was struck, making this design a rarity no matter the date!

This coin is sharply detailed. We think it would merit a higher grade of About Uncirculated. It has been certified as Extremely Fine-40 to reflect the net impact of long-ago minor cleaning. There is some weak strike at the base of Liberty's bust matched by weakness in the cloud on the reverse (which often occurred with early US coins). This may be the finest coin of this date we have ever had.

PCGS Retail shows this coin at \$4,400, *Coin Values* is at \$5,750, and *The Red Book* catalogs it for \$6,000.

3. 1796 Draped Bust Small Eagle Quarter, Good-6, PCGS—\$12,500.

Despite being the “lowest” graded coin in this collection, it is the most prized piece of them all.

This was from the first year that the US Mint ever struck the quarter denomination. It would be another eight years before it again struck quarters, which were of a different design. Mintage is a paltry 6,146. We can count the number of 1796 quarters we have handled in our 47 years in business on one hand.

Most 200+ year-old coins that have seen this much wear exhibit at least some problems. This treasure is an amazing exception. You could look for decades to try to find another example of this grade of equal beauty. In *Good-6 PCGS Retail* shows \$13,000. *Coin Values* catalogs it at \$12,500 in Good-4 and at \$17,500 in Very Good-8. *The Red Book* lists it at \$11,000 in Good-4 and at \$17,000 in Very Good-8.

4. 1805 Draped Bust Heraldic Eagle Quarter, Very Choice About Uncirculated-58, NGC—\$7,595.

Over the past 32 years, PCGS and NGC combined have certified a meager 69 specimens of this rarity in AU-58 and all higher grades. So, don't let the mintage of 121,394 let you think this specimen is common. This is the finest example of the date we have ever had the honor to handle.

To be thorough, there are a few fine scratches above and to the left of Liberty's hair that you might not notice upon initial inspection.

The last specimen to sell in a major auction, over 18 months ago, cost the buyer \$9,400. *PCGS Retail* is \$8,850. *Coin Values* lists it for \$7,250 in AU-55 condition and \$12,500 for MS-60 quality. *The Red Book* catalogs it at \$5,500 for AU-50 and at \$11,000 in MS-60.

5. 1807 Draped Bust Heraldic Eagle Half Dollar, About Uncirculated-50, PCGS—\$2,395.

Mintage is 301,076 for the largest US silver coin struck this year. This

design was only struck for six years. Combined, PCGS and NGC have certified a mere 611 1807 pieces in AU-50 and higher grades. This coin may be the highest quality example we have ever had in stock. The specimen that one of Liberty's staff owns only grades a still respectable Very Fine.

This specimen appears to have been cleaned a very long time ago, with it having retoned a lovely even gold-purple on the obverse and light gold on the reverse. As result, it is a stunning piece.

PCGS Retail catalogs it for \$3,000, *Coin Values* for \$3,750, and *The Red Book* at \$4,750.

6. 1853 Arrows & Rays Seated Liberty Half Dollar, Mint State-62, PCGS—

\$1,695. This coin has the highest mintage, 3,532,708, of the coins offered here. It is also the nicest quality of these treasures. In 1853, the US Mint reduced the weight of the half dollar from 13.36 to 12.44 grams. To draw attention to the reduced weight, arrows were added to the left and right of the date and rays surrounded the eagle. These rays were only used that year, making this a one-year type coins, though the arrows continuing through 1855.

PCGS and NGC certified an average of 20 MS-62 or nicer specimens per year. We may have had one or two higher grade examples in our 47 years in business, but this light golden-colored example is a beauty.

PCGS Retail lists this coin at \$2,000 in MS-62. *Coin Values* and *The Red Book* booth catalog it for \$1,500 in MS-60 and \$3,500 in MS-63.

7. 1795 2 Leaves Flowing Hair Dollar, Fine 15, PCGS—\$3,950. The US Mint first struck a Silver Dollar in 1794, but only 1,758 pieces. Most examples that you might find go for at least \$75,000. The 1795, the second and final year of this design, is much more affordable, with a mintage of 160,295 among all three major types combined. PCGS has certified a modest 567 examples of the 2 Leaves (under each of the eagle's wings) version of the 1795 Dollar (we were unable to find the NGC population for the 1795 2 Leaves variety broken out from the others from that same year). That gives you an idea of just how scarce problem-free specimens of this 223 year-old issue really are.

True, this coin was cleaned a very long time ago. It now exhibits a pleasing and even golden-blue toning on the obverse and reverse. There is a small dig underneath the eagle's beak. For dollars from this part of US Mint history, this is a remarkably problem-free specimen.

We have carried a few other 1795 Flowing Hair Silver Dollars in our 47 years in business, including higher grade pieces. Still, this may qualify as the most problem-free of any of them.

PCGS Retail catalogs this issue in Fine-15 at \$5,150. *Coin Values* has this coin in Fine-12 at \$4,000 and in Very Fine-20 at \$5,500. *The Red Book* lists it at \$4,350 in Fine-12 and at \$6,000 in Very Fine-20.

8. 1800 Draped Bust Heraldic Eagle Dollar "AMERICAI", Extremely Fine-40, PCGS—\$4,395. The Draped Bust Heraldic Eagle Silver Dollar was struck for circulation in only six years, 1798-1803. In 1800, the Mint struck 220,920 Silver Dollars of all varieties combined.

In 1834 and later years, when the US government wanted to issue some coin sets as gifts, it struck a handful of 1804-dated coins of this type, resulting in what today are \$1,000,000+ rarities. The Mint reported that it struck 19,570 Silver Dollars in 1804, but these were almost certainly struck with dies bearing the 1803 date, a common practice of the era.

When dies were made to strike 1800-dated Silver Dollars, one of the reverses had a twig hanging off of the olive branch on the lower left of the reverse. At first glance, it seems like the letter "I" has been added at the end of "AMERICA" (see enlarged photo below). Enough specimens of this variety were struck that it is not worth any more than the other varieties from 1800.

This is certainly one of the nicest, if not the highest graded of the few 1800 Silver Dollars we have ever had. Like the other coins listed here, another problem-free example other than a very old cleaning that has retoned to a beautiful steel-gray

PCGS Retail and *Coin Values* both catalog this rarity at \$4,500, while *The Red Book* is at \$4,600. But, just try to find another specimen of equal grade that is as problem-free as this piece.

9. 1871 Seated Liberty With Motto Dollar, Proof-60, PCGS—\$1,895.

This collection had very few Proof coins, with this being the scarcest. The US Mint struck a limited 950 Proofs this year.

This piece shows evidence of having been wiped multiple times, hence its grade being only Proof-60. However, this evidence of long-ago cleaning can only be seen upon close inspection. Overall, the coin has pleasing virtually white surfaces, with just the slightest hint of gold toning.

We cannot recall ever having a Proof 1871 Seated Liberty Dollar before. If it is not the only one we have ever handled, it is one of the very few.

PCGS Retail lists this coin at \$1,900 in Proof-60 quality. *Coin Values* and *The Red Book* only catalog the Proofs in Choice Proof-63 condition, at \$4,000 and \$3,800, respectively.

From another long-time collector we purchased a few beautiful extremely low mintage 19th Century US Gold Coins, but we don't have space to offer them this time. Look for them to be featured next month.

**A First Time Offer And A Repeat
Of A Popular Sellout!**

Canadian Silver Coins At Bullion Prices!

Enlarged to show detail, actual diameter 1-1/2 inches

The Royal Canadian Mint now issues more than 300 different Canadian coins every year. Most of these are commemorative coins priced at numismatic levels. A handful of the releases are of bullion-priced gold, silver, platinum, and, formerly, palladium coins.

Some of the coins depicted a desirable combination of the themes along with attractive bullion-related prices. In almost all instances where we offered such coins, they sold out.

In June 2016, we were one of the first dealers to offer the 1 Ounce Silver Canada \$5.00 2016 Superman Coins. This was one of our most popular offerings ever, when you compare demand to our available inventory. Then, almost a year ago, we acquired a supply of the 1-1/2 Ounce Silver Canada \$8.00 2015 Polar Bear And Cub Coins. Once again, our supplies sold out quickly. When we uncovered another small group of them later, they also sold out quickly.

The Good News! We recently acquired two moderate-sized batches (one of them literally this week!) of bullion-priced Canada Silver Coins. One was an issue we had not stocked before and the other was more of the Superman Coins.

The new coin in our stock is the original 1-1/2 Ounce Silver Canada \$8.00 2013 Polar Bear Coins. The reverse depicts a mature polar bear lumbering across the barren and frozen Arctic wilderness. This coin has been popular enough that other dealers who have them in stock are pricing them at higher prices than for the 2015 Polar Bear and Cub issue.

The reverse of the Superman coin depicts the iconic "S" symbol that the superhero wore on his chest. This coin was issued to commemorate the 75th anniversary of the debut of the Superman

comic books.

Both coins are 1-1/2 inches in diameter. Because the Polar Bear coins are 50% thicker than the Superman specimens, each tube contains just 15 coins (total of 22.5 ounces of .9999 fine silver). The Superman coins come in tubes of 25 coins (25 ounces of .9999 fine silver).

While our moderate supplies last, we are selling rolls of either of these coins at just \$3.80 per ounce above the ask silver spot price.

(For example, if the ask silver spot price is \$15.80, a roll of either coin would cost you \$19.60 per ounce of silver content. For the Polar Bear coins, your cost would be \$441 per roll [\$29.40 per coin], while the rolls of Superman coins would come to \$490 [\$19.60 each].)

This discounted price only applies while our supplies last. If past experience is any guide, we expect another quick sellout—especially with the silver spot price close to its lowest levels in more than a year.

Call our Trading Desk Today! Reach us toll-free at 800-527-2375 to check on availability, current price, and to confirm your order. Please refer to our Quotes Page for postage charges.

As these coins are offered at bullion-related prices, you cannot use a charge card to purchase them. You must send a check for payment.

(P.S. You can pay much more if you purchase these coins elsewhere. One of the world's largest retailers is offering the 2013 Polar Bear Coins, with orders fulfilled by one of our national dealer competitors, for more than \$40 apiece. It is also charging almost \$30 each for the Superman coins. Other retailers are charging over \$30 to almost \$45 for the Polar Bears and well over \$20 for the Superman coins.)
